FOOD FOR THOUGHT

Just the other day, one of the girls of the student body offered one likely cause for an ailing school spirit when she remarked, "No wonder my stomach thinks the school is preparing to give me meals like that." Her tone was definitely not one of pleasure. Her only error was that "they" don't give me the breakfast they promise. They have overcharged for a two dollar meal, but have only charged ten dollars for another meal costing over ten dollars. After supper, the men were shown through the house, and a young lady was introduced by Dewey Reinowski, Jack Reichard, and the rest of the house committee. The introduction was conducted by Jim Truscillo. Many of the faculty members were present, and all the men seemed pleased with the meal. 

Delta Phi Delta

On February 3, Delta Phi held their final rush. February 18 will reveal the winner of the Delta Phi Delta game. Although the weather is not forecasted to be very pleasant, the men will be present.

WEATHER OR NOT

Brrr... It's cold. In fact, one of the longest and coldest winters we've seen in a long time. But as rain is good for the corn, the sub-zero weather is good for the skaters. The ice on Beebe and Van Natta's Dam is excellent and the weather is perfect for a hot chocolate—or the log cabin for a warm drink. Why not have your next date in mother nature's winter wonderland?

TAPE AND LINIMENT

by Bob Wendland

With all varsity teams engaging their rivals on the road, the main interest in the Phy Ed department has centered upon the activities of the newly formed Varsity Club. Already, the eligible seniors have been accepted into the organization and soon, a few weeks undergraduates who have represented the college in intramural football and soccer contests will be extended blanket invitations to join the group.

Participants in minor sports and basketball will be welcomed as soon as their seasonal involvement is over.

At the present time there is much speculation and interest in the new club, but should their meetings be marred by more displays of pettiness and inefficiency, there will very likely be a terrible decline in student interest.

Apparently, there has been some misunderstanding as to the exact aims of the group and it seems to the editor that the club is to "generally improve the athletic situation here in the college by coordinating the relationships between students and coaches." This of course will be a tremendous, if not an impossible task for the students to accomplish. Especially those who show interest in the group only to gain whatever material awards there might be.

From all reports, there are some already in the club who are currently more interested in getting their pictures taken or in being awarded letters than in building a solid organization which will be of more benefit to them in the future.

I do believe that if we have a club, it should not exist merely to have the students compete against one another. It should be expected that the club be merely a puppet to assist in the presentation of athletic events. But if the club is merely a puppet who has done a wonderful job so far. Any fellows who are interested in joining the group.

Weekly night on the home hardwood court of the Bombers will be held from 7:00 to 9:00 o'clock. The Bombers will have a strong Sr. Scunton team and the Ithaca College will be the Bombers home winning streak date. The Bombers have been unbeaten on the home floor this season. On the 20th the Blue and Gold will meet the Ithaca College.

But there are some limiting factors that you'll have to discuss with the program department.

RADIO AT RANDOM

By Paul Medley

As you must know by now, there is a new set of characters on the staff of the Radio Workshop. And, like any new broom, a "clean sweep" was the business of the day at the first meeting of the new staff. (Literally.) After some discussion, it was decided that those radio students and others who continue to demonstrate a real interest in the weekly activities of the workshop are eligible for a much timelier exchange each week as they want. The other radio majors, those very few who show up only when the lights are down, could be assigned every two weeks, as they have in the past. Thus, those of you who really want more experience will be given that opportunity. Other departments are still more than happy to have only one new face a month or so.

The main point that came out in the discussion was that there is considerable pressure evident in the matter of having one person do a show as many times as he or she wants to. That means that you can't have the same star turn every week. Thus, you can prepare the program department and your friends that some of your shows will be assigned for the second time.
