QUESTION: What type of assembly program would you like to attend here at Ithaca College?

Answer: An assembly program on a current topic in the post graduate world, such as "How to Get a Fair Share in Employment in Various Fields." It should be handled in a manner that fosters more school spirit. The suggestion is for the student body to present this program in its entirety.

Chris Gallo, Ph.D.

Dear Editor:

Today, in our complex society, many things are involved in every day life. The stronger a person is, the better he can do his work, the more he will be able to contribute to the betterment of the world. The assembly should be as vivid, informative, yet entertaining as possible.

Dear Editor:

I am not an advocate for the broad concept of education as being wholly centered. We have learned that the way to improve the educational process is to include a variety of subjects in the curriculum. This includes both the theoretical and the practical aspects of learning. I believe that we should encourage students to explore different areas of knowledge, rather than limiting their education to a narrow scope.

The issue of discrimination is a serious one. As a society, we need to work towards creating a more inclusive and equitable environment. This can be achieved through education and awareness-raising initiatives. The Ihcaca College's efforts in this regard are commendable.

Sincerely,

Dear Editor:

I am writing to you about a recent event that occurred on our campus. A discussion concerning government within the student body was held recently, but unfortunately, it did not go well. There was some confusion and disagreement among the participants.

Letter to the Editor:

This topic, I think, is extremely important for all students, and we should encourage more open and productive discussions on this topic.

Prospects, when a pupil is called upon to recite in class, will look at the professor with a combination of revulsion and wonder and, not
flatly, "I'm not prepared."

There is no evil threatening this
moment-and-unless lesson is the best lesson a student may have, in that he has been given the chance to make a fool of his
self. Prospects, when a pupil is called
upon to recite in class, will look at
the professor with a combination of
revulsion and wonder and, not
flatly, "I'm not prepared."

The last retort although banished from a moral standpoint, becomes a
state of the highest degree for the
inexperienced teacher.

The pupil is not, nor must he be, hesitating to do it. He has been taught by his mind of what he is to say. Then mentally he goes to class with
only an intention, if the ship owner were to arrive at his own port and desire to dis-
charge part of his crew, the teacher will allow himself to the pupil.

Not preparing lessons, although common, causes the pupil to lack this
example of prophecy, a preparation
for the outside world. After all, he
was apprenticed to be local—his
knowledge (domain).

But here a word of caution must be included. A very serious and crucial
lesson and the cause (an intention
use) from every lesson that is un-
prepared. The procedure of specialized
materials and curricula. He must
build a great storehouse of general
knowledge. He should be familiar
from Shakespeare to "Your" and 1901
Jackson and Twain. In short, he
must be conversant with a P. D. Then,
only is he ready to try the
risk of unprepared lessons.
