

⚡ ENERGY, ITS ELECTRIC! ⚡

Why we need to reduce our energy use.

- 1) Energy is one of IC's biggest expenses, by reducing it we can save money that can go to academic programs or financial aid.
- 2) Reducing energy decreases our reliance on fossil fuels which cuts back on pollution and slows down the rate of global warming.
- 3) Reducing energy use reduces air pollution released from

Change a Light Change the World

In the next couple of weeks, resource representatives working for REMP will be knocking on your door and asking how many lamps you have. By the end of the semester each room will be given a certain amount of compact fluorescent bulbs based on the results. Compact fluorescent bulbs are more energy efficient than incandescent bulbs and last for as long as five years.

This idea is inspired by the change a light change the world

Some Tips to Save Energy...

- 1) Shut off lights when you leave your room, the lobby, or bathrooms. If you see a light on in an area that isn't being used, flick it off.
- 2) Turn off appliances when not in use. Just by being plugged in, most appliances use energy.
- 3) Enable power save modes on your computer; turn it off at night when you are not using it.
- 4) Take shorter showers; heating water is IC's number one energy use.
